Virtual Tour

Website & Download

<https://www.3dvista.com/en/products/virtualtour>

The screenshot shows the product page for 3dvista Virtual Tour PRO. The page has a dark theme with a navigation bar at the top containing links for Home, Products, Store, Samples, VR, Support, Blog, and About. The 3dvista logo is in the top left, and a language selector for English is in the top right. On the left side, there is a 3D rendering of the product box, which features a tree with pink blossoms and the text '3dvista Virtual Tour PRO'. The main content area on the right has the product name 'VIRTUAL TOUR PRO' in large white letters, followed by the tagline 'ONE TIME FEE. UNLIMITED TOURS FOREVER'. Below this is a paragraph describing the software's features, such as creating 360-degree virtual tours with various views, sounds, and interactive hotspots. A second paragraph states that the tours are compatible with any computer, tablet, or phone without the need for installation or plugins. At the bottom of the main content area, there is a price of 499€ and a 'PURCHASE NOW' button. To the right of the price is a 'Download Trial' button with a Windows logo icon, which is highlighted with a red rectangular border. Below the purchase buttons are icons for Apple and Windows. At the bottom, there is a section titled 'FREE GIFTS WITH THIS PURCHASE' which lists three items: 'Stitcher 4 (99€)', '3-month optional 3DVista Hosting (30€)', and '1 year of free Upgrades included (optional afterwards)'.

Virtual Tour **PRO**

VIRTUAL TOUR PRO

ONE TIME FEE. UNLIMITED TOURS FOREVER

Create interactive 360° virtual tours in the most easy and pleasant way: 360° views (panoramas), 360° videos, embedded sounds, videos and photos, floorplans and fully customizable frames. Start telling actual stories with multifunctional hotspots and clickable objects that your audience discovers when walking through the tour. New 3D transition effect and unique features, such as Animated Panorama, Live Panorama (day-to-night effect), Adaptive HDR and 360° video with hotspots on top.

Virtual Tours can be seen on any computer, tablet or phone (Android & iOS) – no installation or plugins needed. Online & Offline. VR compatible.

499€ [PURCHASE NOW](#) [Download Trial:](#) 

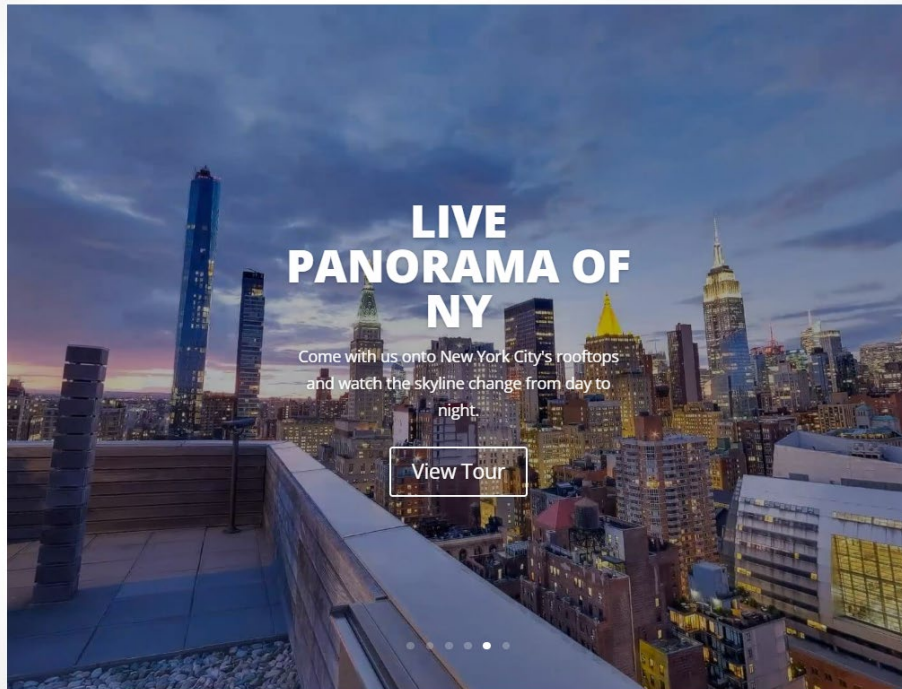

FREE GIFTS WITH THIS PURCHASE

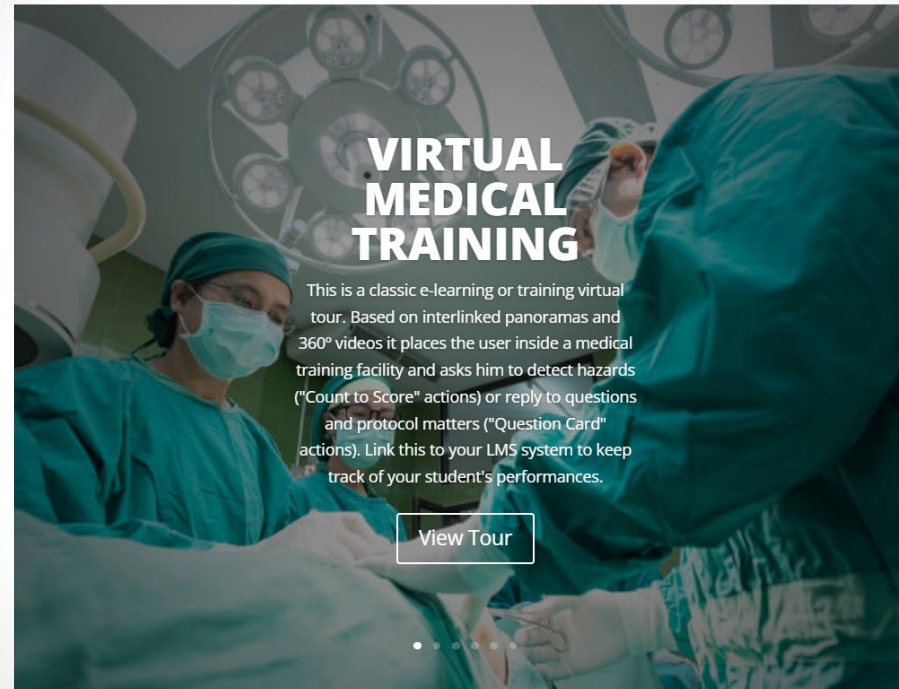

- Stitcher 4 (99€)
- 3-month optional 3DVista Hosting (30€)
- 1 year of free Upgrades included (optional afterwards)

E-LEARNING & TRAINING TOURS

FOR MORE SCALABLE TRAINING WITH CONTENT THAT STICKS

WHAT IS THE MAIN PURPOSE OF THIS COMPONENT IN VEHICLE TRACTION SYSTEMS?

- A** Transform engine power into vehicle motion
- B** Increase to saturate the traction capacity
- C** Divide the force
- D** Increase the resistance of the joints

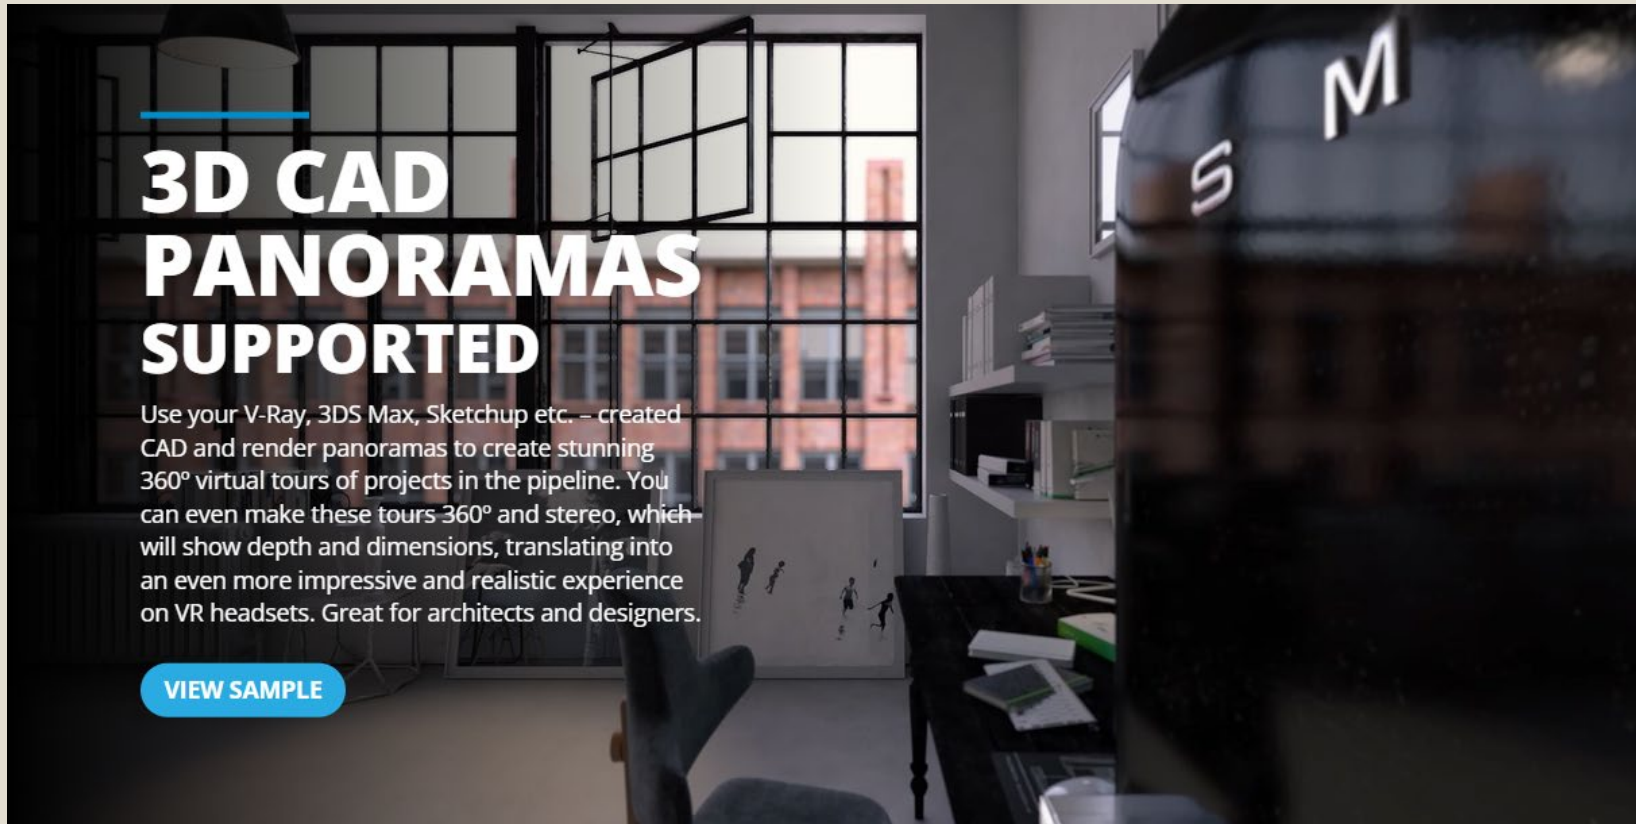

DONE

Turn your virtual tours into comprehensive teaching and testing tools with discovery hotspots ("treasure hunts"), question or quiz cards, integrated scoring, reporting systems and LMS integration. Combined with the traditional 3DVista functions, this converts your 360° canvas into a powerful tool for the creation of virtual twins and training that is safer, less intrusive and more scalable than on-site practice. Simulate scenarios, situations and places and use gamification or conditional actions to allow students to battle each other and to earn badges while learning.

Discovery learning, remote field trips, facility tours, training simulations, health & safety quizzes and hazard hunts are just a few applications that virtual tour training took by storm.

Demos

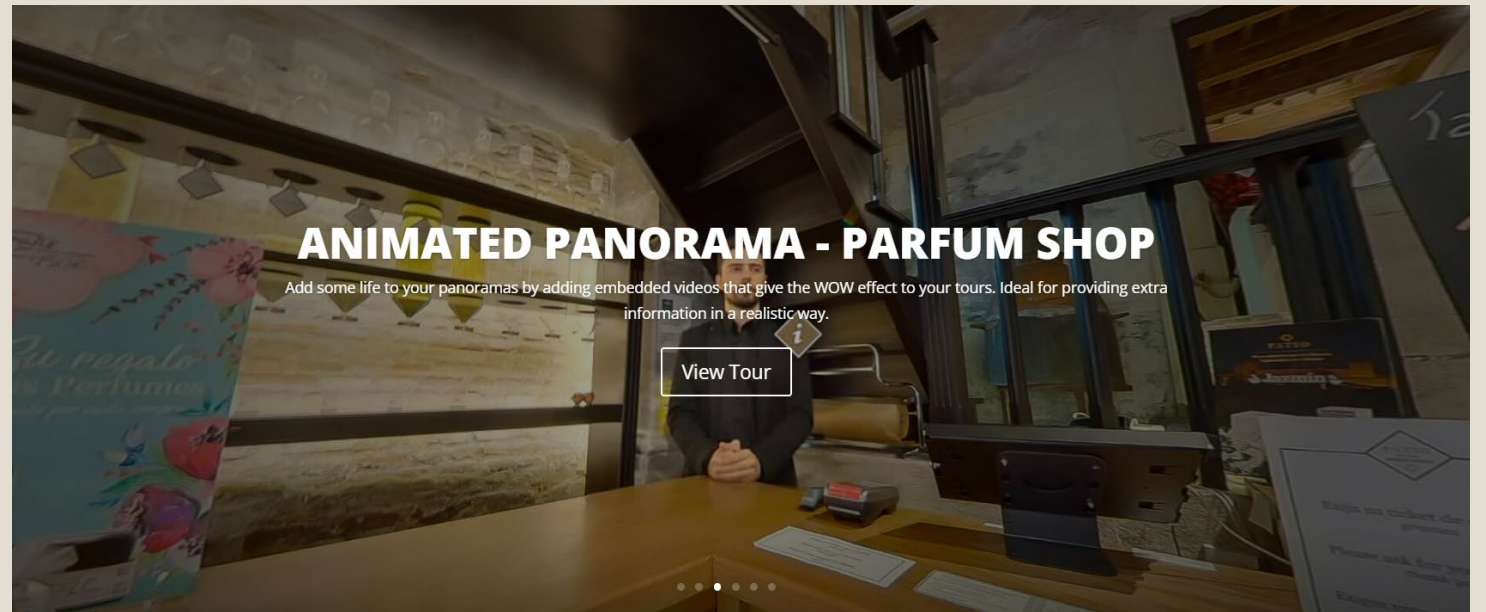

**3D CAD
PANORAMAS
SUPPORTED**

Use your V-Ray, 3DS Max, Sketchup etc. – created CAD and render panoramas to create stunning 360° virtual tours of projects in the pipeline. You can even make these tours 360° and stereo, which will show depth and dimensions, translating into an even more impressive and realistic experience on VR headsets. Great for architects and designers.

1 seconds

Perfect to maximise reach.
This will publish your tour as a 360* video so you can upload it to platforms that otherwise would not accept your tour's format.
The video will feature your playlist's Panoramas and 360* videos, allowing the audience to look around while automatically taking them from spot to spot.

Destination: C:\Users\yolan\Downloads\nah\New American Home light\media\floorplans
