The screenshot displays the MONSTA file manager interface. At the top, there is a navigation bar with a back arrow, a forward arrow, a refresh icon, and the MONSTA logo. Below this is a breadcrumb trail showing the current directory. The main area is a table listing files and folders. The 'htdocs' folder is highlighted with a red box, and an orange arrow points to it from the title above. The table has columns for Name, Size, Changed, and Permissions. At the bottom, there is a toolbar with various file management icons.

# 建立資料庫

**MySQL Databases**

MySQL Databases allow you to store lots of information in an easy to access manner. The databases themselves are used by many web applications including some bulletin boards, content management systems, and others. To use a database, you (as the control panel login user) has privileges to access a database and read from or write to that database.

# 程式更改

可把所有連線的資訊寫在 conn\_db.php中

## conn\_db.php

```
conn_db.php • del.php
C: > xampp > htdocs > heart > conn_db.php
1  <?php
2
3  //本機連線
4  //$pdo = new PDO('mysql:host=localhost; dbname=health; charset=utf8','web','1234');
5
6  //遠端主機連線
7  $pdo = new PDO('mysql:host=sql200.byethost16.com; dbname=b16_31848082_health; charset=utf8','b16_31848082','');
8  ?>
```

改所有需要資料庫連線的程式, ex. del.php

```
12  <p> [ DEL ] </p>
13  <p>&nbsp;</p>
14
15  <?php
16  require_once("conn_db.php");
17  $sql=$pdo->prepare('delete from heart where id=?');
18  if ($sql->execute($_REQUEST['id'])) {
19      echo 'Delete Success ! ' . '<br>'; }
20  else {
21      echo 'Delete Failed !' . '<br>';
22  }
23
```

利用 `require_once("conn_db.php");`
