### MySQL 資料庫

MySQL Databases allow you to store lots of information in an easy to access manner. The databases themselves are not easily read by humans. MySQL databases are required by many web applications including some bulletin boards, content management systems, and others. To use a database, you'll need to create it. Only your MySQL Username (same as your control panel login user) has privileges to access a database and read from or write to that database.

您可以在此新增或移除您的 MySQL 資料庫

#### Create new database

New Database:

您正在使用 1 of 50 個資料庫。

#### Delete a database

sum_19717973_test	sum_19717973	(Your cPanel Password)	sql309.summerhost.info	Backup	Admin

如果您有連線到 PhpMyAdmin 的問題，請先登出 vPanel，清除瀏覽器 cookies 和 Firefox 的 [已驗證 session]，並重新登入。

Did you know premium hosting allows you to create individual MySQL users and privileges? All premium accounts have upto 1GB of mysql storage. To see a demo: [Click here](#)

The screenshot shows a web interface for managing a database. The browser address bar shows 'sql309.byetcluster.com' and the database name 'sum\_19717973\_basic'. The interface includes a navigation menu with options like '结构', 'SQL', '搜索', '查询', '导出', '导入', '操作', and '程序'. The main content area is titled '导入到数据库' and shows the database name 'sum\_19717973\_basic' in a red box, with a blue callout bubble pointing to it that says '新的資料庫名稱'. Below this, there is a section for '要导入的文件' (Files to import) with a red box around it. It contains instructions: '文件可能已压缩 (gzip, bzip2, zip) 或未压缩。压缩文件名必须以 .[格式].[压缩方式] 结尾。如: .sql.zip'. There is a '从计算机中上传' (Upload from computer) button, a text input field containing 'basic.sql', and a note '(最大限制: 300 MB)'. Below that is a '文件的字符集' (File character set) dropdown menu set to 'utf-8'. The '部分导入' (Partial import) section has a checked checkbox for 'Allow the interruption of an import in case the script detects it is close to the PHP timeout limit...' and a text input field for '从首行起要跳过的行数' (Number of rows to skip from the first row) set to '0'. The '格式' (Format) section has a dropdown menu set to 'SQL'. The '格式特定选项' (Format-specific options) section has a dropdown for 'SQL 兼容模式' (SQL compatibility mode) set to 'NONE' and a checked checkbox for '不要给零值使用自增 (AUTO\_INCREMENT)'. At the bottom of this section is an '执行' (Execute) button. On the right side of the browser window, there is a vertical sidebar with a 'Menu' button, a red circular icon, and a red banner with the text '106/ 挑戰 郵'.

# 導入成功

The screenshot shows the phpMyAdmin interface for a database named 'sum\_19717973\_basic'. A green message box at the top indicates a successful import: '导入成功, 执行了 13 个查询。 (basic.sql)'. Below this, the content of the imported SQL file is displayed, including metadata like 'phpMyAdmin SQL Dump', 'version 4.5.1', and 'http://www.phpmyadmin.net'. The interface also shows the '导入到数据库 "sum\_19717973\_basic"' section with various options for file upload, character set (utf-8), and import settings like 'Allow the interruption of an import' and 'SQL 兼容模式'.

The screenshot shows a web-based SQL management interface. The browser address bar indicates the URL is `sql309.byetcluster.com` and the current database is `sum_19717973_basic`. The interface includes a navigation menu with options like '浏览' (Browse), '结构' (Structure), 'SQL', '搜索' (Search), '插入' (Insert), '导出' (Export), '导入' (Import), and '操作' (Operations).
